SCOPE EDUCATION SERVICES

A PATH TO ENDLESS POSSIBILITIES

Course Descriptions

Meditation and Mindfulness (M&M) (NEW COURSE)

Stress, anxiety, depression, and other mental health issues have skyrocketed during the pandemic. For students, much has changed, and learning to adjust to the high demands of school while still dealing with Covid is challenging indeed. Come learn some new techniques, take time for yourself and celebrate all of YOU! Learn mindful meditation to lower stress and anxiety. Use music to move, dance, and promote a feeling of wellbeing. **Taught by Mrs. O'Hanlon**

Arts Paper Scissors

Join us in creating a variety of sensational projects. Get creative and have fun while using materials such as water-colors, clay, paint and more. Preserve your clothes and bring a smock!

Arts & Crafts 6-8

Get ready to create artistic projects in a variety of styles of art. From sketching, clay sculpting, tee-shirt design, and painting, this class is fun for everyone! Get ready to explore your creative side and show off your masterpieces to your friends!

Bound for Broadway

Do you love the music and song of Broadway? Join us in learning the song and music of your favorite Broadway shows! This choral review course will allow students to learn about their favorite Broadway shows, the music and performance, as well as learn their favorite show tunes. Students will learn acting, improvisation and singing skills.

Cool Caribbean Cooking

This class will focus on Caribbean and Latin American recipes and traditions all while cooking cold dishes. Enjoy creating masterful creations using fruits and vegetables, as well as making cool and refreshing treats like smoothies, shakes, and home-made ice cream. **You'll make cold dishes such as, guacamole, tapas, gazpachos, salmorejo and much more!** *If your child has food allergies we will make every effort to accommodate his/her needs, but please be aware that all ingredients are not guaranteed to be free of all various allergens.

Coding & Technology

Have you ever wondered how to code a video game, create animations or your own story on the computer? Want to have fun on the computer and get creative? We will explore computer science through coding, educational websites, videos and unplugged lessons. This introductory course will feature an outstanding curriculum focusing on **problem based solving, logical thinking, creativity, resilience, persistence and boost your child's confidence!**

A PATH TO ENDLESS POSSIBILITIES

Course Descriptions

Edible Science

Have you ever wondered how things work? Discover, explore, and learn about our wonderful world through tasty science experiments! Eat slime! Construct the layers of the Earth and claim you have eaten the world! Come join us and explore the possibilities! *If your child has food allergies we will make every effort to accommodate his/her needs, but please be aware that all ingredients are not guaranteed to be free of all various allergens.

Extreme Sports

Have loads of fun with your friends while improving physical fitness and teamwork skills. Learn skills and techniques in team sports such as basketball, hockey, soccer, and other gym sports. Play with and against your friends as you enjoy sports and enjoy the benefits of a healthy, active lifestyle. You will also learn cooperation skills through physical fitness activities and sports.

Extreme STEAM

This course is designed to enhance children's thinking skills by having them participate in exciting and stimulating science activities. Students will learn concepts in building and design as well as other scientific concepts. Students will use exciting supplies and resources to build and explore the world of STEAM.

Fun with Nature

Do you love to collect flowers, rocks, sticks, and leaves but you're not sure what to do with them? Let's explore the nature around us and create art and crafts with your findings. Be prepared to get a little messy during this fun and hands-on class. Students will create bird feeders, sun catchers, plant seeds, go on scavenger hunts, and MORE! Join this adventure and get creative!

LEGO Challenge

Our LEGO engineering program includes STEM based challenges and free building experiences. They will use LEGOs in ice to discover how archaeologists work to uncover fossils. We will test the laws of physics by building bridges and skyscrapers and test their stability in simulations. Students will work to problem solve and will love rising to the LEGO challenge.

Music Movement & More

Children will work on their fine motor and gross motor skills by participating in movement related activities. Musical hoops, soccer and sponge relays are amongst some of the high-energy activities keeping students running and jumping!

Paint Nite in the AM

Students will learn through step by step tutorial based instruction on how to create and paint their own canvas creations. Students will bring home their artistic creations and enhance their expressive art skills.

SCOPE EDUCATION SERVICES

A PATH TO ENDLESS POSSIBILITIES

Course Descriptions

Rocketry and Retro-Science

Science is exploratory and exciting! It's about the "Aha!" moments in life, like when you figure out how something works or when you're amazed by the result of an awesome experiment. You will have the opportunity to learn about science through our interactive hands-on science activities that will be sure to spark your imagination! Students will learn about Newton's laws of motion and build and launch their own model rocket. So c'mon and get messy!

Sports Fitness & Fun

Run a wacky race, toss bean bags at targets, play basketball and much more. Have loads of fun with your friends while improving physical fitness and teamwork skills. Enjoy the benefits of a healthy, active lifestyle while learning cooperation skills through physical fitness activities and sports. Leave behind the T.V. and video games and come join in the action! THE FUN IS HERE!

Story Book STEAM

In this class, you will be working like engineers to create and solve problems from some of your favorite story-books! WE will be going on adventures through stories such as "How I Became a Pirate", the "Three Little Pigs", "Rapunzel", "Horton Hatched the Egg" and "The Most Magnificent Thing". You will work together to solve the character's problem by creating something. If you love reading, this class is for you!!

Spotlight on Theater

Do you love writing, dance, and theatre? Join Movement Storytelling! Students will work individually and/or together to write and perform visual narratives for lyric-less songs, and to perform words by dissecting the meaning of sentences. We'll move to music, monologues, and maybe your own poetry or short stories! Big imaginations welcome in this supportive environment focused on creativity and cathartic expression.

Taste the Rainbow

Come join us and explore the possibilities of tasting the rainbow! Discover exciting ways to work with others to create different recipes. These colorful foods will help you grow strong and healthy, and you will get the chance to create a cookbook full of these wonderful ingredients. We will discuss the benefits of these foods, and we will even be able to eat them!

Travel the World

This unique experience will enhance your child's cultural awareness and provide a valuable introduction to the study of world languages. Students will explore greetings, family, weather, numbers, colors, food and culture through songs, games and other fun activities!

Up-Cycling Art

Turn garbage cans into gold. Teach the importance of renewing and recycling. Turn old items into something new. This fun class is for kids who want to take unused items and restore into a work of art. Join the recycling and renew club!
